Summary

Results driven Computer Science Engineering undergraduate with hands-on experience in AI/ML, full-stack web development, and cloud technologies. Proficient in building scalable applications using Python, React.js, FastAPI, and modern AI frameworks, with experience in Microsoft Azure and DevOps fundamentals. Seeking Software Engineering, AI/ML, or Cloud roles.

Education

Rajasthan Technical University (RTU) — **2023 – 2027**
Bachelor of Technology in Computer Science and Engineering — CGPA: 8.94/10.0
Kota, Rajasthan

Technical Skills

Languages	C, C++, Java, Python
Web Development	HTML, CSS, JavaScript, React.js, Tailwind CSS
Backend	Node.js, Express.js, Flask, FastAPI
Databases	MongoDB, MySQL
AI/ML & GenAI	Machine Learning, Deep Learning, NLP, Transformers, RAG, LangChain, Scikit-learn, NumPy, Pandas, Matplotlib
Cloud & DevOps	Microsoft Azure, Git, GitHub Actions, CI/CD, Docker, Linux, Bash, Vercel, Render
APIs & Tools	Google Gemini API, OpenAI API, Groq API, GitHub, VS Code, Jupyter Notebook

Work Experience

GRRAS Solutions Pvt. Ltd. — **May 2026 – Jul 2026**
DevOps Intern

- Designed and deployed highly available Azure infrastructure using Application Gateway, VM Scale Sets, Virtual Network, and Azure DNS.
- Implemented secure cloud networking with subnets, NSGs, and custom Ubuntu images through Azure Compute Gallery.
- Built a CI/CD pipeline using Azure DevOps, Docker, and Azure Container Registry (ACR) to deploy a Node.js application on Azure App Service.

Getraise Pvt. Ltd. — **Jun 2025 – Jul 2025**
AI/ML Intern

- Developed and deployed machine learning models under the Technical Department, covering data preprocessing, model training, evaluation, and deployment.
- Implemented and benchmarked multiple ML algorithms, iterating on model performance through systematic evaluation.
- Collaborated on AI-based project delivery, receiving an **Excellent** performance rating from the organization.

Projects

Resume AI – Intelligent Resume & Job Match Analyzer — GitHub | Live Demo
React 19, Vite, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, Gemini 2.5 Flash, Vercel, Render

- Built and deployed a full-stack AI analyzer using **Google Gemini 2.5 Flash** for a 0–100 impact score, ATS compatibility %, skill-gap detection, and a **job matcher** with match % and keyword gaps for any job description.
- Developed a **Node.js/Express.js** REST API with **MongoDB Atlas**, **JWT** auth, PDF parsing, analysis history, and a multi-model Gemini fallback chain; React dashboard with Recharts skill radar.

Bureaucracy Survival RPG – RAG-Powered Policy Game — GitHub | Live Demo
React 19, Vite, Tailwind CSS, FastAPI, LangChain, BM25, Groq API (Llama 3), Vercel, Render

- Built and deployed a full-stack **RAG** web game: users upload a policy PDF and an LLM Game Master judges in-game actions against its actual clauses, citing the section.
- Implemented a retrieval pipeline with PyPDFLoader, recursive chunking, and **BM25** search (top-3 chunks) feeding structured JSON output from **Llama** via the **Groq API**, requiring no embeddings or GPU.
- Added multi-turn memory, per-IP rate limiting (20 requests/hour), and automatic model detection; deployed on **Vercel** (frontend) and **Render** (REST backend).

AI-Driven DevSecOps Pipeline — GitHub
Azure Pipelines, DevSecOps, Bandit, Trivy, Gemini API, Docker, Python

- Built an automated **DevSecOps pipeline** using Azure Pipelines integrating SAST analysis (**Bandit**), container vulnerability scanning (**Trivy**), and LLM-based code review using **Gemini API**.
- Implemented **severity-weighted security gates** to automate vulnerability assessment and generate an audit dashboard for improved code security visibility.

Certifications

- **Introduction to Generative AI** – **Google Cloud** *2026*
- **Web Development with Elm** – **Infosys Springboard** *2026*
- **AI & ML Internship Certification** – Getraise Pvt. Ltd. *2025*
- **Python & Machine Learning Training** – Think Wave Technologies *2024*

Achievements & Activities

- Participated in multiple national and university-level hackathons focused on AI, Web Development, and Cloud Computing.
- Contributed to open-source projects through **GirlScript Summer of Code (GSSoC)**.
- Solved **200+** Data Structures and Algorithms (DSA) problems on **LeetCode**.
